PROJECTS
Project Phoenix
https://bit.ly/3RQ6W1o
https://bit.ly/3DA5eNf
Covid-19 Contact Tracing System | 45 days
Google | Apache NetBeans
Project Phoenix is a Contact Tracing system that helps the local government units (LGU) to lessen the contact of possible contamination and exposure through log books and other items where people usually log their information.
- Real-time record of every person's input
- Easy to spot information
